

Environmental Impact Assessment: A Practitioners Guide

Environmental Impact Assessment (EIA) is a recognized practice area for professional Agrologists in Alberta. It is therefore important for Agrologists interested in EIA to have a forum to further develop their understanding of EIA. The EIA professional development course will review the basic concepts and regulatory requirements for EIA and discuss recent developments in EIA practice. The course will be delivered in two sections, part one will discuss EIA fundamentals and regulations that shape the scope of EIA in Alberta. Session two will focus on the practice of EIA and provide an in depth discussion on the professional attributes required to practice EIA and the role of the EIA consultant in Alberta.
