

Biography: Robyne Bowness Davidson

Robyne Bowness Davidson is a Pulse Research Scientist with Alberta Agriculture and Forestry in Lacombe. She has many years of experience in the agricultural industry conducting research trials on a wide variety of field crops within government and the private sector. She has been working with pulse crops for the past 17 years leading and conducting pulse research trials across Alberta. She has been involved in the introduction of new pulse crops and the expansion of pulse crops across the prairies. She enjoys the extension piece of her research role and highly values the work she does with industry and farmers. She and her husband Dave operate a 4000 acre grain farm near Red Deer, Alberta.
