

Biography: Victoria Linden

Victoria Linden is the Director of Research at Cereals Canada. She holds a M.Sc. in Plant Science from the University of Manitoba in plant breeding and pathology. In her role at Cereals Canada, Victoria co-chairs an industry wide working group to set national wheat research priorities for both the public and private sectors. Additionally, she works to ensure that the Canadian cereal value chain has access to modern agricultural tools such as new breeding techniques and plant protection products domestically as well as ensuring access to key export market countries.
